Subject: To issue building safety for P.D. Memorial School Dhar Bithoria, Haldwani

Following a detailed inspection of the school premises, it is confirmed that the building satisfactorily complies with the required safety standards to ensure the protection and well-being of students, staff, and visitors.

Structural Integrity:

The building is structurally sound, with no visible cracks or weaknesses, and demonstrates adequate load-bearing capacity. The construction quality appears durable and reliable.

Campus Layout and Segmentation:

The campus is well-organized and divided into three functional segments, ensuring efficient use of space and smooth movement of students:

- The first segment is dedicated to administrative activities, providing a separate and organized environment for school management and staff operations.
- The second segment houses the primary classes. This area is designed with special consideration for young children, featuring wide, unobstructed, and well-ventilated passages that allow for safe and quick evacuation if required. The layout minimizes congestion and enhances accessibility.
- The third segment is allocated for upper primary classes and includes a broad and sturdy staircase, facilitating safe movement of students, especially during peak hours and emergency situations.

Ventilation and Lighting:

All classrooms and corridors are well-constructed, properly ventilated, and receive sufficient natural light, ensuring a healthy environment.

Electrical and Fire Safety:

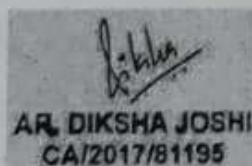

Electrical wiring and installations are secure and regularly inspected. Fire extinguishers are installed at appropriate locations to manage emergency situations effectively.

Access and Emergency Preparedness:

The building provides clear entry and exit routes, with unobstructed pathways for safe evacuation. The premises are well-maintained and clean.

Overall, the school building complies with the required safety norms and provides a safe and suitable environment for educational activities.

Thank you.
